Canadian orders are charged actual freight charges plus $10.00 for handling.

Excerpts From an Interview

with **Daniel Rirdan**,
founder of the ***Wide Ranging Line***

"...I still remember when I found out that the green color on a physical map does not mean forest-but just elevation. Seems like many of the things the map industry has done is because that's the way they were always done."

"...Actually, that blew me away. There is no such thing as 'Western Sahara,' which American maps dutifully list. That area is the southern province of Morocco. Or take 'Taiwan' -- this is not the country, just the name of the main island." [R.O.C.]

"... It has always bothered me that classroom maps do not acknowledge Indian reservations or key nations around the world, especially when there is such a definite trend in schools to heighten multicultural awareness."

"... When I first saw the information from the Census Bureau I was actually shocked. When you look at conventional wall maps you see a little dot for, say, Boston, and then there is another little dot for New York City and so forth. The reality is quite a bit different."
